

# Leaseweb

## About Leaseweb

Leaseweb is a worldwide hosting provider of Infrastructure as a Service (IaaS), serving a global portfolio of 17,500 customers, ranging from SMEs to large companies. Services include Public Cloud, Private Cloud, CDN (Content Delivery Network), Bare Metal Servers, Managed Hosting, Co-location and Hybrid Solutions, with 24/7 support.

## Migration to SAP

DX has been asked to take care of the data migration of equipment and contract details from the NL and UK portfolios from the CAS source system to SAP.

## Main aspects of this migration

**74.000**  
Contracts

**Big Bang**  
Big bang after several trials

**SAP**  
Migration from CAS to SAP

## From requirements to successful migration

DX has taken care of the entire migration process: specifying the requirements, realising the conversion software, setting up the control framework, the trials, etc. The acceptance tests and development were performed iteratively, thus continuous and visible progress was made during the project.

*The founders of Leaseweb, Con Zwinkels and Laurens Rosenthal, were professional pilots in their early days. Don't assume anything. Check and double-check everything. They are lessons learned which were embedded in the DNA of Leaseweb. As such, it makes perfect sense to provide customers with a fully redundant network in which double capacity is maintained! You want to be prepared for anything. This explains why commercial aircraft never have a single engine.*
